

How Close To 100?

You need: Two players and two dice. The first partner rolls two number dice. The numbers are used to make a rectangle on the grid. The goal is to fill up the grid. After the player draws on the grid, they write the number sentence that describes the grid. The second player then rolls the dice and repeats. The game ends when both players have rolled the dice and cannot put any more shapes on the grid. How close to 100 can you get?

1. _____ x _____ = _____

2. _____ x _____ = _____

3. _____ x _____ = _____

4. _____ x _____ = _____

5. _____ x _____ = _____

6. _____ x _____ = _____

7. _____ x _____ = _____

8. _____ x _____ = _____

9. _____ x _____ = _____

10. _____ x _____ = _____

Challenge: Can you work out what you would have to roll To perfectly fill the grid in exactly 10 rounds?
