

# ACTION

# RESPONSE

### Fluency

1.  $276 \div 12$

4.  $288 \div 18$

2.  $416 \div 13$

5.  $270 \div 15$

3.  $420 \div 12$

6.  $336 \div 21$

### Reasoning

Josh has an industrial jar of tomato ketchup. It has 882 ml in it. His job is to put it into smaller 18ml sachets. How many can he make?

There are 864 pupils and staff in a school. They all go to visit London on a school trip. How many 36 seat coaches do they need to hire?

### Problem Solving

Consider all three digit numbers formed using different digits from 0, 1, 2, 3 and 5. How many of these numbers are divisible by 6?
