

ACTION

RESPONSE

Convert between improper fractions and mixed numbers.

Fluency

1. $\frac{13}{5}$

4. $2\frac{3}{7}$

7. $\frac{15}{2}$

2. $1\frac{1}{5}$

5. $\frac{17}{3}$

8. $4\frac{1}{8}$

3. $\frac{21}{6}$

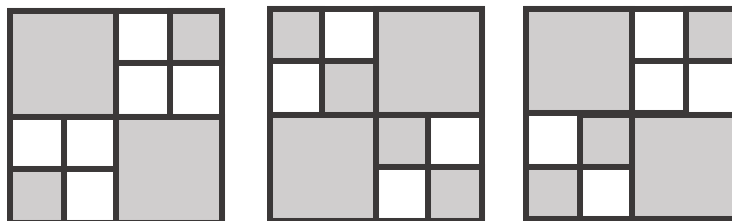

6. $3\frac{4}{9}$

9. $\frac{19}{7}$

Reasoning

Below are three large squares that have each been partly shaded. Express how many large squares are shaded in total as a fraction?

Problem Solving

Fred ran $2\frac{2}{5}$ km and James ran $3\frac{1}{4}$ km. Find the difference in the distance that they ran:

a) As a fraction.

b) As a distance.

ACTION
