

# Find the HCF of 56 and 40

Step 1: Set up a table

56	40
	1
	2
	4
	5
	8
	10
	20
	40

Remember these are all pairs, so if you find 5 you know the other is 8!

Remember factors are numbers that go into another number without leaving a remainder!

Step 2: Trial these numbers into 56 starting with the biggest!

56	40
40	1
20	2
10	4
8	5
	8
	10
	20
	40

First list all the factors of the smaller number! It will be easier to find them all.
